

D8-M3 Micro Squirrel® Fixings

Micro Squirrel® Fixings have been developed to allow fabricators to make a mechanical screw fixing into a 12mm sheet of solid surface material where space is restricted. The insert is recessed to a maximum of 8mm into the back of the sheet to prevent the insert from being visible through the face side.

Please note that the inserts will be visible through translucent colours.

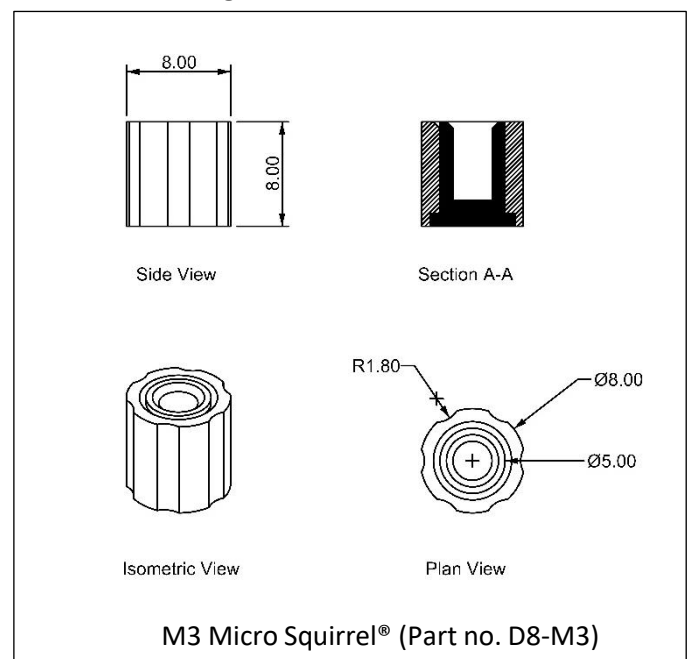

Uses:

- Fixing of door handles.
- Fixing of hinges.
- Drawer fronts.
- Signage.
- Under-mounting stainless steel sinks.
- Furniture assembly.
- Plus many other applications.

Fitting Instructions:

- Rout a 8mm diameter x 8mm deep pocket.
- Clean pocket with De-Natured Alcohol.
- Assemble Steel and solid surface components.
- Test fit Squirrel® fixing into pocket.
- Quarter fill pocket with adhesive.
- Place Squirrel® fixing into pocket.
- Give fixing a ¼ turn.
- Allow approx. 30-40 mins to harden before sanding away excess adhesive.

Technical Drawings

Specifications:

- Available thread sizes: M3 only
- Tested to 300kg loading. (Certificate available)
- Height: 8mm (+0.2mm)
- Diameter: 8mm (-0.1mm)
- Made from Recycled solid surface material
